

*No wonder you
couldn't wait
to take it home.*

You can bet every thief out there wants it, too, but they could care less about its beauty—or your pride of ownership. They just want to rip it off, break it down and sell the parts.

- In the U.S., a car is stolen every 26.4 seconds, and less than 60 percent of stolen cars without a security system are ever recovered.
- Once inside the “chop shop,” a car can be stripped and the parts moved out in less than two hours.
- When stolen cars are recovered, they’ve usually been stripped of parts, vandalized, wrecked, flooded or burned.
- Only a very small percentage of car thefts are ever cleared by arrest if the car does not have a vehicle security system.

SIGNATURE PROTECTION™

About EFG

At EFG, we are proud to have served as an industry innovator since 1977. The company was born from a need to plan, design and develop adequately reserved, financially sound consumer protection products. Today, EFG is a world-class financial service products administrator committed to continuous development of innovative products, services and go-to-market strategies across a multitude of channels. Every consumer protection contract in EFG’s portfolio is underwritten by an AM Best rated “A” (Excellent) insurance company. EFG has built a 28-year uninterrupted relationship with the same premier insurance underwriter for our vehicle service contract products.

SIGNATURE SECURITY™

Theft Protection

*You love your
new car.*

*Don't let
it get away.*

SIGNATURE SECURITY™

Theft Protection

EFG Companies' industry-leading, Signature Security™ Theft Protection system protects your beautiful new car from theft — and makes it much easier to trace if it does get stolen. Signature Security Theft Protection offers serious protection that will make even the most ingenious thieves head on down the highway and leave your car alone.

When it comes to theft, we help your car play "hard to get."

DNA label leaves an embedded UV visible ID if removed.

Signature Security DNA Trace System

EFG's Signature Security DNA Trace System is a covert marking system that is applied by your car dealership's trained technicians to six hidden panels on your vehicle, such as the underside of the hood and trunk lids and next to the locking mechanism on each car door. The marks are not visible under normal viewing conditions, but once your vehicle is marked, the "DNA" labels penetrate the paint finish to provide an embedded ID that glows when exposed to a "black" or ultraviolet light even if the label is removed.

Signature Security Window-Etch Marking System

EFG's Signature Security Window-Etch is an overt marking system that is expertly applied by trained technicians at the car dealership and serves as a "Stop" sign in most instances of attempted theft. If your car is stolen, however, Window-Etch enables easier, quicker vehicle identification by law enforcement officers and facilitates faster recovery of your vehicle. The permanent, Window-Etch window stencil is applied to the bottom right corner of the front and rear windshields, the bottom corner of the door window above the door handles, and the corner of any rear window, t-top or sunroof.

\$2,500 Theft Benefit

If your new or used vehicle is stolen within the time frame for coverage as stipulated by your Signature Security Theft Protection contract, and it is not recovered within thirty days—or is recovered and declared a total loss by your comprehensive insurance carrier—you will receive a theft benefit of up to \$2,500. (Please see your contract for other important terms, limits and conditions.)

The Benefits Are Beautiful:

- No deductible
- Protects you for a three-year term
- Provides a \$2,500 theft benefit
- Offers protection on both new and used vehicles
- Offers a convenient, single toll-free number for claims
